

LAOS SAILONG MINING & METALLURGY CO., LTD.

老挝赛龙矿冶有限公司

NON-FERROUS METAL RECYCLING & RESOURCE RECOVERY PLATFORM

Enhanced Corporate & Strategic Partnership Profile | 2026

Strategic Partner: Pervasive Capital Investments Pte. Ltd. (Singapore)

Executive Overview

执行概要

Laos Sailong Mining and Metallurgy Co., Ltd. is an operating non-ferrous metals recycling and smelting platform in Bolikhamxay Province, approximately 68 km south of Vientiane. Established in 2013 and upgraded into a mining and metallurgy company in May 2023, the business processes scrap, residues and metallurgical by-products sourced from international markets into saleable metal-bearing products for China and neighbouring markets.

老挝赛龙矿冶有限公司位于老挝波里坎赛省，距万象约68公里。公司始建于2013年，并于2023年5月升级为矿冶企业，主要将来自国际市场的废料、渣料及冶金副产物加工为可销售的含金属产品，服务中国及周边市场。

Industrial Platform & Processing Capability

工业平台与加工能力

Integrated processing

The facility combines hydrometallurgical and pyrometallurgical routes with primary and secondary refining. This flexibility allows campaigns to be configured around feedstock chemistry, recovery objectives and commercial specifications.

厂区结合湿法与火法工艺，并具备粗炼与精炼能力，可依据原料化学成分、回收目标及商业规格灵活配置生产。

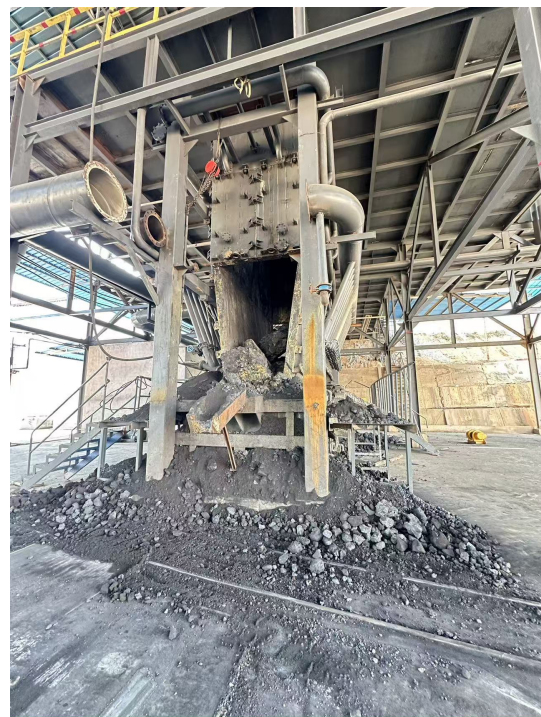

Installed production assets

The company reports one 1.2 m² blast-furnace line, one 4.5 m² blast-furnace line, five medium-frequency furnaces, two reverberatory furnaces, four open-hearth furnaces, one hydrometallurgical system, plus mineral-processing and drying lines.

公司披露的设备包括1条1.2平方米鼓风炉生产线、1条4.5平方米鼓风炉生产线、5台中频炉、2台反射炉、4台平炉、1套湿法系统，以及选矿和烘干生产线。

Furnace handling and processing equipment within the operating plant.

From Secondary Material to Saleable Product

从二次资源到可销售产品

1 FEEDSTOCK	Scrap, residues, slag and other metal-bearing secondary materials sourced from approved suppliers.
2 RECEIVING & TESTING	Weighing, sampling, laboratory analysis, segregation and campaign planning.
3 PRE-PROCESSING	Unloading, crushing, mineral preparation and drying as required.
4 RECOVERY & REFINING	Hydrometallurgical and/or pyrometallurgical treatment, followed by primary or secondary refining.
5 FINISHED OUTPUT	Casting, storage, quality documentation and sale to approved regional or international buyers.

Intermediate metal-bearing material and palletised finished products. Product identity and specification remain subject to assay and commercial documentation.

Storage, Logistics & Scalability

仓储、物流与扩展能力

Warehousing & logistics

Four dedicated warehouses - two for raw materials, one for semi-finished materials and one for finished products - provide a stated minimum storage capacity of 30,000 tonnes, equivalent to approximately three months of production storage. The site also includes five weighing systems, two crushing systems and three unloading platforms.

厂区设有4个独立仓库：2个原料仓、1个半成品仓和1个成品仓，最低仓储能力为3万吨，可满足约3个月生产储存需求；另配有5套称重系统、2套破碎系统和3套卸货平台。

Expansion reserve

Approximately 60,000 m² of construction-ready land is reported to be available for additional lines. Expansion should be phased against contracted feedstock, proven recoveries, environmental approvals, utility capacity and secured offtake.

公司披露约6万平方米待建场地，可用于新增生产线。扩建应以已签约原料、经验证的回收率、环保许可、公用工程容量及已落实的销售渠道为前提分期实施。

Strategic Partnership with Pervasive Capital Investments

与Pervasive Capital Investments的战略合作

Pervasive Capital Investments Pte. Ltd. is presented as the strategic partner to support Sailong’s transition from a capable operating plant into a disciplined regional resource-recovery platform. The partnership is intended to strengthen commercial access, financing readiness and governance while Sailong retains responsibility for licensed local operations and technical execution.

Pervasive Capital Investments Pte. Ltd. 作为本项目战略合作伙伴，拟协助赛龙由具备生产能力的工厂升级为管理规范的区域资源回收平台。合作重点在于提升商业渠道、融资准备度及治理水平；赛龙继续负责老挝当地合规运营及技术执行。

PARTY	PRIMARY CONTRIBUTION
Pervasive Capital Investments	Strategic planning; investment structuring; international feedstock origination; buyer and offtake development; investor engagement; governance and reporting framework; regional expansion and potential Oman/ASEAN market integration.
Laos Sailong Mining & Metallurgy	Plant operations; permits and local compliance; workforce; sampling and processing; production control; maintenance; local stakeholder relations; product preparation and dispatch.
Joint Project Team	Feedstock approval; assay reconciliation; campaign economics; working-capital controls; HSE and ESG improvement plan; monthly operating dashboard; expansion investment gates.

The precise legal, commercial, equity and funding terms of the strategic partnership are to be documented in definitive agreements.

Commercial Development Priorities

商业发展重点

SECURE FEEDSTOCK	Build a diversified, compliance-screened supplier pipeline under assay-based purchase formulas and controlled payment terms.
LOCK IN OFFTAKE	Qualify regional refiners and industrial buyers; agree specifications, pricing references, penalties and settlement mechanisms.
IMPROVE WORKING CAPITAL	Introduce lot-level inventory controls, insured storage, borrowing-base discipline and trade-finance structures.
RAISE RECOVERY VALUE	Prioritise feedstocks through test campaigns, metallurgical accounting and net-smelter-return analysis.
EXPAND SELECTIVELY	Add capacity only after technical validation, approvals and contracted throughput support acceptable returns.
STRENGTHEN ESG	Upgrade emissions, dust, wastewater, residue management, worker safety and auditable chain-of-custody systems.

Finished-product storage inside the covered plant area.

Governance, Control & ESG Roadmap

治理、管控与ESG路线图

The strategic partnership should institutionalise the plant around measurable operating and risk controls. The immediate objective is not merely higher throughput, but more predictable margins, cleaner audit trails and bankable performance data.

PHASE	KEY DELIVERABLES
0-90 days	Baseline technical, environmental, legal and commercial due diligence; permit register; asset condition review; inventory count; sampling protocol; HSE gap assessment.
3-6 months	Monthly management accounts; lot-level metallurgical accounting; supplier and buyer KYC; approved counterparty limits; emissions and wastewater monitoring plan; preventive maintenance schedule.
6-12 months	Trade-finance readiness; independent assay reconciliation; insurance programme; audited ESG indicators; product traceability; contracted feedstock/offtake portfolio.
12-24 months	Investment-gated debottlenecking or expansion; improved recovery circuits; renewable-power assessment; residue valorisation; certification pathway where commercially justified.

Market Position & Growth Thesis

市场定位与增长逻辑

Sailong reports an established international customer and partner network spanning China, Taiwan, Europe, Japan, Tunisia, Thailand, Malaysia, the Philippines, Mexico and Bolivia. The profile also reports more than ten partner mines and relationships with major international, Chinese-listed and large Southeast Asian enterprises.

赛龙披露其客户及合作网络覆盖中国、中国台湾、欧洲、日本、突尼斯、泰国、马来西亚、菲律宾、墨西哥和玻利维亚，并已与10余家矿山及多家国际行业企业、中国上市公司和东南亚大型企业建立合作。

The growth thesis is to combine this operating base with Pervasive Capital Investments' cross-border commercial platform: source suitable secondary raw materials, process them under controlled campaigns, sell into verified offtake channels, and expand only where the full value chain is contracted and financeable.

增长逻辑是将现有生产基础与Pervasive Capital Investments的跨境商业平台相结合：获取合适的二次原料，按受控批次加工，通过已验证的销售渠道实现销售，并仅在全价值链具备合同保障及可融资条件时进行扩张。

“A regional circular-metals platform built on operating assets, disciplined feedstock selection, verified recovery and secured market access.”

Proposed 12-Month Joint Work Programme

拟议的12个月联合工作计划

1. Validate	Complete technical, legal, environmental and commercial diligence; confirm feedstock/product scope and baseline economics.
2. Standardise	Implement sampling, assay, reconciliation, inventory, reporting, HSE and counterparty-control procedures.
3. Contract	Secure compliant feedstock frameworks, trial lots, product specifications, offtake arrangements and logistics routes.
4. Finance	Develop working-capital facilities, trade-finance structures and project-level investment materials supported by validated data.
5. Optimise	Run controlled campaigns, measure recoveries and margins, debottleneck the plant and establish a monthly improvement cycle.
6. Scale	Approve additional lines or regional integration only after investment-gate criteria are met.

Important Qualification & Next Steps

重要说明与下一步工作

Information basis. Operating figures and market statements in this profile are based on information supplied by Laos Sailong Mining and Metallurgy Co., Ltd. They have not been independently audited or technically verified for this publication.

资料基础：本简介中的运营数据及市场陈述来源于老挝赛龙矿冶有限公司提供的资料，尚未为本文件之目的进行独立审计或技术核验。

Product and process qualification. Photographs are illustrative of the supplied plant and inventory. They do not constitute certification of material identity, grade, ownership, recoverability, environmental status or saleability. Each feedstock and product lot remains subject to sampling, independent assay, mass-balance reconciliation and contractual acceptance.

产品与工艺说明：图片仅用于展示所提供的厂区及库存情况，不构成对物料身份、品位、所有权、可回收性、环保状态或可销售性的认证。每批原料和产品均应进行取样、独立化验、物料平衡核对及合同验收。

Partnership status. Pervasive Capital Investments Pte. Ltd. is identified as the strategic partner for the proposed development platform. Final scope, authority, economics, exclusivity, investment obligations and liability allocation must be set out in signed definitive agreements.

合作状态：Pervasive Capital Investments Pte. Ltd. 被列为拟议发展平台的战略合作伙伴。最终合作范围、权限、经济安排、排他性、投资义务及责任分配须以正式签署的协议为准。

Recommended immediate actions

1. Execute NDA and strategic cooperation framework. 2. Complete site, permit and asset diligence. 3. Select two to three trial feedstocks and agree assay/payment protocols. 4. Identify qualified offtakers and specifications. 5. Build a validated campaign-level financial model. 6. Agree governance, reporting and investment gates.
